August 14, 2024

Parents and Guardians of incoming grade 1 - 8 students,

This notification concerns the possible issue with the math summer assignment for incoming grade 1-8 students. If your student already completed the assignment please disregard this message.

ST Math is experiencing unforeseen technical issues that are interfering with some students' ability to access the house icon on their ST Math screen. The house icon is the access point to the Summer Bridge assignment: Addition and Subtraction Facts (incoming grades 1-4) and Multiplication and Division Fact (incoming grades 5-8). If your student cannot access the house icon, please complete the Alternate Assignment.

### Alternate Assignment for Summer Bridge:

Your student can continue working in the ST Math Journey by clicking on the map icon. The student can continue the learning sequence that was accessed during the school year. The goal is to complete two more objectives from the Journey. The student will see JiJi the penguin plant a flag at the top of the mountain when an objective is completed.

Please keep in mind the math summer assignment is optional. Students who complete the summer assignment earn an extra 10 points on their first math assessment. It is the honors system for parents to sign off on page two of the parent summer bridge letter that the student completed the original assignment or the alternative assignment. To find the original letter you can go to the bboed website <https://www.bboed.org/Page/2028>

Kindly,

Dawn Aiello
