<b>HS-LS1</b> From Molecules to Organisms: Structure and Processes	<ul> <li>HS-LS1-2 Develop and use a model to illustrate the hierarchical organization of interacting systems that provide specific functions within multicellular organisms.</li> <li>HS-LS1-3 Plan and conduct an investigation to provide evidence that feedback mechanisms maintain homeostasis.</li> <li>HS-LS1-4 Use a model to illustrate the role of cellular division (mitosis) and differentiation in producing and maintaining</li> </ul>		Recommended Activ Interdisciplinary Conn Experiences to Explor	vities, Investigations, 1ections, and/or Student re NJSLS-S within Unit	
FOUNDATION Disciplinary: <i>Core Idea</i>	FOUNDATIONFOUNDATIONDisciplinary:Disciplinary:Core IdeaStatement				
LS1.A: Structure and Function -Multicellular organisms have a hierarchical structural organization, in which any one system is made up of numerous parts and is itself a component of the next level. (HS-LS1-2)		<ul> <li>Essential Question/s:</li> <li>How do the body systems of animals allow them to collect information about their environment and respond appropriately?</li> <li>How does a cell produce a new cell? How are cell structures adapted to their functions?</li> </ul>			

<b>LS1.B</b> : Growth and Development of Organisms	-Feedback mechanisms maintain a living system's internal conditions within certain limits and mediate behaviors, allowing it to remain alive and functional even as external conditions change within some range. Feedback mechanisms can encourage (through positive feedback) or discourage (negative feedback) or discourage (negative feedback) what is going on inside the living system. (HS-LS1-3) -In multicellular organisms individual cells grow and then divide via a process called mitosis, thereby allowing the organism to grow. The organism begins as a single cell (fertilized egg) that divides successively to produce many cells, with each parent cell passing identical genetic material (two variants of each chromosome pair) to both daughter cells. Cellular division and differentiation produce and maintain a complex organism, composed of systems of tissues and organs that work together to meet the needs of the whole organism. (HS-LS1-4)	<ul> <li>Activity Description:         <ul> <li>Savvas Realize Interactivity- Osmosis</li> </ul> </li> <li>This digital activity provides an opportunity for students to investigate osmosis and the concentration gradient by looking at a cell before and after equilibrium, as well as three cell environments: isotonic, hypotonic, and hypertonic.         <ul> <li>Savvas Realize Interactive Video- Maintaining Homeostasis</li> <li>This interactive video features the disease cystic fibrosis as it relates to different levels of organization in the body and maintaining homeostasis.</li> <li>Savvas Realize Quick Lab- Make a Model of Mitosis</li> </ul> </li> <li>Students will design and build models of mitosis. They will evaluate the accuracy of their models and present their models to their classmates.</li> <li>Savvas Realize Science Skills Activity- Investigating Cell Regulation</li> <li>This digital activity provides an opportunity for students to investigate internal regulation mechanisms for cell growth and what factors regulate it.</li> <li>Savvas Realize- Biology Foundations: Animal Systems I and II</li> <li>The worksheets from the Reading Workbook reviews the main ideas of the chapters and helps to practice vocabulary. Use these lesson summaries and reading tools to increase your understanding of chapter vocabulary and concepts.</li> <li>Spotlight on scientists and their accomplishments- Percy Levon Julian</li> <li>Students will research the life and contributions of African American chemist and entrepreneur, Percy Levon Julian. Students will summarize what they have learned and prepare a short discussion or presentation on how Julian's work changed the science community and the world.</li> </ul>
FOUNDATION Science and Engineering Practices: <i>Core Idea</i>	FOUNDATION Science and Engineering Practices: Statement	<ul> <li>Interdisciplinary Connections: Content: ;NJSLS#: <u>Connections to NISLS – English Language Arts</u></li> <li>WHST.9-12.7 Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject,</li> </ul>

<b>Developing and Using Models</b> Modeling in 9–12 builds on K–8 experiences and progresses to using, synthesizing, and developing models to predict and show relationships among variables between systems and their components in the natural and designed worlds.	-Develop and use a model based on evidence to illustrate the relationships between systems or between components of a system. (HS-LS1-2) -Use a model based on evidence to illustrate the relationships between systems or between components of a system. (HS- LS1-4)	<ul> <li>demonstrating understanding of the subject under investigation. (HS-LS1-3)</li> <li>SL.11-12.5 Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest. (HS-LS1-2), (HS-LS1-4)</li> <li><i>Connections to NJSLS – Mathematics</i></li> <li>MP.4 Model with mathematics. (HS-LS1-4)</li> <li>HSF-IF.C.7 Graph functions expressed symbolically and show key features of the graph, by hand in simple cases and using technology for more complicated cases. (HS-LS1-4)</li> </ul>
Planning and Carrying Out	-Plan and conduct an investigation	• <b>HSF-BF.A.1</b> Write a function that describes a relationship
Investigations	individually and collaboratively to	between two quantities. (HS-LS1-4)
Planning and carrying out in 9-12 builds on K-8 experiences and	produce data to serve as the basis	
progresses to include investigations	decide on types, how much, and	
that provide evidence for and test	accuracy of data needed to produce	
conceptual, mathematical, physical,	reliable measurements and	
and empirical models.	consider limitations on the	
	of trials cost risk time) and refine	
	the design accordingly. (HS-LS1-3)	
<b>Connections to Natures of Science:</b> Scientific investigations Use a Variety	-Scientific inquiry is characterized by a common set of values that	
of Methods	include: logical thinking, precision,	
	open-mindedness, objectivity,	
	and honest and ethical reporting of	
	findings.	
FOUNDATION Crosscutting Concepts:	FOUNDATION Crosscutting Concepts: Statement	

Dev. Date: 2016-2017/Rev 2022

Core Idea		
Systems and System Models	-Models (e.g., physical, mathematical, computer models) can be used to simulate systems and interactions— including energy, matter, and information flows—within and between systems at different scales. (HS-LS1-2), (HS-LS1-4)	
Stability and Change	-Feedback (negative or positive) can stabilize or destabilize a system. (HS-LS1-3)	
Social and Emotional Learning: Social and Emotional Learning:		
Competencies	Sub-Competencies	
Self Awareness	-Recognize one's feelings and thoughts -Recognize the impact of one's feelings and thoughts on one's own behavior -Recognize one's personal traits, strengths, and limitations -Recognize the importance of self-confidence in handling daily tasks and challenges	
Self Management	-Understand and practice strategies for managing one's own emotions, thoughts, and behaviors	

Social Awaranass	-Recognize the skills needed to establish and achieve personal and educational goal -Identify and apply ways to persevere or overcome barriers through alternative methods to achieve one's goals	
Social Awareness		
	<ul> <li>-Recognize and identify the thoughts, feelings, and perspectives of others</li> <li>-Demonstrate an awareness of the differences among individuals, groups, and others' cultural backgrounds</li> <li>-Demonstrate an understanding of the need for mutual respect when viewpoints differ</li> <li>-Demonstrate an awareness of the expectations for social interactions</li> </ul>	
	in a variety of settings	
Responsible Decision-making		
Relationshin Skills	-Develop, implement, and model effective problem-solving and critical thinking skills -Identify the consequences associated with one's actions in order to make constructive choices -Evaluate personal, ethical, safety, and civic impact of decisions	
	-Establish and maintain healthy relationships -Utilize positive communication and social skills to interact effectively with others	

		-				
	<ul> <li>-Identify ways to resisting in appropriate social pressure</li> <li>-Demonstrate the ability to prevent and resolve interpersonal confliction in constructive ways</li> <li>-Identify who, when, where, or how to seek help for oneself or other when needed</li> </ul>	st nt is w is				
Assessment To show evidence of meeting the engag	ts (Formative) standard/s, students will successfully se within:	Assessment To show evidence of meeting the con	Assessments (Summative) To show evidence of meeting the standard/s, students will successfully complete:

	<b>Disciplinary Concept:</b> • Critical Thinking and Problem Solving • Information and Media Literacy	5					
NJSLS CAREER READINESS, LIFE LITERACIES & KEY SKILLS	Core Ideas:	<ul> <li>Collaboration with individuals with diverse experiences can aid in the problem-solving process, particularly for global issues where diverse solutions are needed.</li> <li>Digital tools such as artificial intelligence, image enhancement and analysis, and sophisticated computer modeling and simulation create new types of information that may have profound effects on society. These new types of information must be evaluated carefully.</li> </ul>					
	Performance Expectation/s:       • 9.4.12.CT.4: Participate in online strategy and planning sessions school-based, or other project and determine the strategies that ceffective outcomes.         • 9.4.12.IML.3: Analyze data using tools and models to make valic claims, or to determine optimal design solutions (e.g., S-ID.B.6a., 7.1.IH.IPRET.8)						
	Career Readiness, Life Literacies, & Key Skills Practices						
	Utilize critical thinking to make sense of problems and persevere in solving them. Students readily recognize problems in the workplace, understand the nature of the problem, and devise effective plans to solve the problem. They are aware of problems when they occur and take action quickly to address the problem; they						

thoughtfully investigate the root cause of the problem prior to introducing solutions. They carefully consider the options to solve the problem. Once a solution is agreed upon, they follow through to ensure the problem is solved, whether through their own actions or the actions of others.
<b>Information and Media Literacy</b> Information and Media Literacy empowers learners to access, retrieve and produce well managed resources. This access promotes and fosters inquiry learning as well as a deep understanding of target knowledge, skills or concepts. Information and Media Literacy is the vehicle for learners to pursue and create relevant information using the opportunities of high-quality materials. Information and media literacy also includes a basic understanding of ethical use of information.
